play

vinci
play

About us

Vinci Play is a company bringing happiness to children all around the world.

We design, manufacture and install fully safe, aesthetically pleasing and extremely attractive playgrounds. We root for beautiful and imaginative design that stimulates the child's unbridled curiosity while encouraging kids to have fun together. Nearly as many as 80 million girls and boys play joyfully on the Vinci Play devices in over 50 countries around the globe. Such a vast number of parents have placed their trust in us because every day we strive to give children what they need so much – some carefree fun in a safe and friendly environment, while our customers can enjoy extremely durable, top-quality equipment covered by an unrivalled 30- year warranty. Our professional attitude makes us a reliable business partner for those companies and institutions that are looking for a competent playground manufacturer. Our two factories equipped with the most modern equipment, including welding robots, 3D and 2D lasers and many other devices are enabling efficient and effective completion of orders. We employ over 250 people from all over the world, and we all have one goal: witness children's joy in a safe, inspiring and fabulously colourful environment.

What makes us unique

Advanced production processes

From the design, through production, all the way to shipping, the highest quality and safety of the playground are our priorities at every step of the way. In the production process, we implement only certified materials, and the multi-stage quality control system ensures that all equipment components that leave our production line meet stringent safety norms. We employ top specialists in their field who ensure a high standard of our products, reliable customer service and professional maintenance service of the equipment. Our modern machine park and advanced production organisation facilitate 4-week order processing. We also offer products with a 7 and 14-days production time and goods that are available directly from the warehouse.

We are proud to offer children, their parents and guardians the guarantee of carefree fun and relaxation on the playground, thanks to the strict safety procedures and quality standards implemented within our company.

Customer service

Our Customer Service department operates guided by the highest standards of cooperation, confirmed by the ISO 9001: 2015 certificate. The employees of this department endeavour to respond to inquiries addressed to the company within the shortest time possible while meeting the expectations of even the most demanding buyers. We guarantee cooperation based on the understanding of the customer's needs and offer full support at every stage of the contract execution, during the warranty period and afterwards.

Care for the environment

Care for the natural environment constitutes a vital aspect of our business activities. FSC® certificate number RINA-COC-000904: (licence number FSC® C163573) confirms the use of materials from well-managed FSC certified forests and other controlled sources. We follow the principles of sustainable development in all our undertakings, including the selection of contractors and suppliers. We hold the ISO 14001: 2015 certificate, which confirms the implementation of an environmental-management system.

Standards and safety

Children's safety is of the utmost importance to us, which is why all Vinci Play equipment complies with the EN 1176 European standard. The products also hold the TÜV Rheinland or TÜV SÜD certificate, which confirms their safety and high quality. Our high-end specialists support the Customer during the playground planning process to guarantee the compliance of the project with the applicable EU safety standards.

Quality control

All the elements that make up the final Vinci Play equipment undergo a multi-phase and precise quality control to ensure that they comply with the EN 1176 standard. Our quality specialists use modern laboratory, as well as devices and measuring equipment to evaluate the quality of materials at every stage of production – from the acceptance of goods or components, through all manufacturing steps, all the way to packaging and preparation for shipment. Owing to regular controls and audits of our suppliers and contractors, we make sure that we cooperate only with verified companies.

Laser steel cutting

The LCS laser, which is the most modern integrated system for cutting profiles and metal sheets, enables optimal metal processing parameters, allowing to obtain the best results in the shortest time.

Welding robots

Welding robots working on matrices built especially for our needs. They increase efficiency thanks to the possibility of carrying out welding processes in a continuous manner. The quality of welding connections is at the highest level thanks to the use of the latest CMT technology. All robots work on high-class welding machines.

Steel welding

Our products are characterised by the highest quality of welds and a precise finish, which guarantees safe use and durability of our playground equipment. A team of highly-qualified welders, supported by cutting-edge welding robots, ensures the finest quality connections of the steel components.

Abrasives treatment (shot blasting)

The steel used to manufacture the Vinci Play playground equipment is subjected to a shotblasting cleaning process which allows us to obtain the proper surface, as well as even welds and edges. This ensures better paint adhesion, thus making the product even safer, more durable and even more aesthetically pleasing. We use professional shot-blasting chambers to process elements of different sizes. For hot-dip galvanised steel, we use electrocorundum shot blasting, and in the case of carbon steel, we employ shot blasting using broken cast steel shot.

Powder coating

Our products are aesthetically pleasing and are available in a wide range of colours thanks to the modern powder coating line. We use the highest quality, child-safe paints which hold the QUALICOAT certificate. Our powder coating process complies with strict standards for the temperature of paint heating, coating thickness and adhesion of the paint to steel elements.

Welding of stainless steel tubes

The entire production process of stainless steel tube slides is performed by highly-qualified Vinci Play employees. They design the tubes, then roll them with high precision, match all the elements of the device, and finally, connect the components using durable and secure welds. At Vinci Play, we implement high-quality AISI 304 and AISI 316 stainless steel.

Galvanisation

We always galvanise steel components before applying powder paint. Galvanisation offers effective protection of the metal surface against corrosion caused by atmospheric conditions. We use two types of galvanisation: powder and hot-dip. We store metal components galvanised with the help of both techniques, as this allows us to swiftly process orders of our customers.

Processing ropes

We use the highest quality 16mm-thick steel ropes with polypropylene or nylon braiding for the manufacturing of climbing equipment and components, as well as for bridges and interlaces. We link them with durable fasteners made of plastic, stainless steel or aluminium. The rope elements are dimensioned, cut to the appropriate length, and then connected using hydraulic presses with a pressure of 150 tons.

CNC

We purchase the HDPE and HPL sheets that we use for the production of our equipment from leading manufacturers around the world. This ensures that we use components of the highest quality. The plates are machined using CNC milling plotters which guarantee precise cutting and milling. The desired shapes and millings – compatible with even the most complicated design requirements – are characterised by their high aesthetic and educational values and at the same time meet the highest standards of safe use.

Robinia cutting and milling

The 5-axis Robinia acacia wood cutting and milling machine is an excellent tool for precise execution of even the most complex details. Complemented by meticulous manual work in surface grinding, allows us to achieve the best results for production of the Robinia series.

Hand made finish

Our experienced carpenters passionately process and finish all wooden elements by hand, and each piece of equipment is built individually. The process is complemented by modern 5D machining centres, which precisely prepare repeatable details. This way, we produce the highest quality elements, fast order fulfilment, and high production efficiency.

Wood processing

CNC saws and industrial robots precisely cut and machine the wood used for the production of wooden parts of our playground equipment. Chamfering of the wood removes any sharp edges, and four-sided surface sanding prepares the wood for the impregnation process. The high quality of wooden elements guarantees the safety of the equipment, and the automation of the process ensures short manufacturing time and fast order realization.

Wood painting

For the production of our wooden equipment, we use pine wood which has been glued together in plies under pressure. The process of machining square timbers, which entails sanding, impregnation, painting, drying and hardening, takes place on a fully automated production line. The wood undergoes a multi-stage protection process, which guarantees long-term durability of the wooden parts of our equipment and makes them resistant to weather conditions.

Materials and components

At Vinci Play, we believe that every detail matters, therefore, for the production of our equipment, we use the highest quality materials and components with certificates, and cooperate with world-renowned manufacturers. Only thanks to this we are able to obtain the final product, which is not only aesthetic and functional, but also safe and compliant with applicable standards.

Wood

Laminated wood with a cross-section of 90 mm x 90 mm. Top-quality first-class wood: without knots, uniform colour, straight grain. Ground, impregnated and varnished over a multi-stage production process. Protected from the top with durable plastic covers and from the bottom with hot-dip galvanised steel anchors, which secure the wood against direct contact with the ground, and thus prevent the development of rot, consequently extending its life span.

Robinia wood

Acacia is the most durable wood found in Europe. The wood is characterized by natural, light colours. It does not require impregnation due to the content of many oils, which naturally protect the material very well against weather conditions, rotting processes and pests. Acacia is distinguished by exceptional hardness, resistance to moisture or contact with soil. We obtain this wood from European FSC®-certified forests and other controlled sources.

Stainless steel

An AISI 304 or AISI 316 stainless steel construction used for the production of playground equipment, slides, tube slides, fasteners and chains. With a smooth surface, it is completely weather-resistant, thus ensuring its long life span.

Steel components

A steel construction of components is made of profiles with various cross-sections. It is available in the following options:

- hot-dip galvanised and powder coated with UV-resistant paints holding the QUALICOAT certificate,
- as a steel construction: shot-blasted, iron-phosphated, powder galvanised and powder coated with UV-resistant paints holding the QUALICOAT certificate.

HEXA platforms

Anti-slip and waterproof HPL or, optionally, waterproof anti-slip plywood. Cross-structured plywood coated with a hot-pressed phenolic film with a honeycomb surface imprint – it offers increased resistance to abrasion, mechanical damage and chemical agents. It is PFEC-certified.

HDPE

HDPE is a high-density polyethylene. It represents a high-quality material which is resistant to atmospheric agents, i.e. it is waterproof, resistant to frost, UV radiation or moisture. We use three-layer plates (with a black core made of 100% recycled granulate) for the production of various panels, roofs and other playground components.

HPL

HPL is a duroplastic laminate cured with polyurethane-acrylic resins, forming a highly resistant surface layer that protects against external factors. HPL sheets are resistant to chemical and biological factors, UV rays and fluctuating weather conditions. This laminate is used for the production of various types of panels, roofs and other playground components. It is PFEC-certified.

Polycarbonate (PC)

An excellent alternative to glass, a very durable material with similar transparency, and at the same time twice as light and 200 times more resistant to impacts. Additionally, it is resistant to weather conditions, including UV rays and a wide range of temperatures. Used by us for the production of panels, covers and windows or spherical 3d windows (portholes).

PP tunnels

Tunnels with a double wall resistant to deformations, made of PP (diameter of 500 or 600 mm). Resistant to wear and tear, acts of vandalism and external factors.

Ropes

Galvanised steel ropes with a diameter of 16 mm, covered with polypropylene or nylon, connected with plastic, stainless steel or aluminium connectors, resistant to UV radiation, abrasion and rot.

Climbing stones

Colourful climbing stones made of durable composite resin with mineral fillers; resistant to abrasion and UV radiation.

Slides

Slides are made of AISI 304 stainless steel, resistant to acts of vandalism and external factors. Our offer also includes versions made of fiberglass. The side panels of a slide are made of HDPE or HPL sheets, which are resistant to weather conditions, including frost and UV radiation.

Inox slides

Slides made of AISI 304 stainless steel, resistant to vandalism and external factors. Made with attention to every detail, with the highest quality welds, they are an elegant finish for products for playgrounds.

Tube slides

Slides made of certified AISI 304 and AISI 316 stainless steel. Sheet thickness: 2.5 mm, diameter of the slide: 790 mm, sanded surface. The length of the slide exit depends on the length of the slide itself, the exit cap is made of a pipe with a diameter of 33.7 mm. Available variants: straight, curved or spiral (360 degrees). The tube slides meet the EN 1176 Standard.

PE tubes

Made of colourful, impact-resistant and scratch-resistant polyethylene (PE) with inside diameter approx. 75cm. Tubes are available in various bright colours, shapes (straight, curved, spiral) and from different heights.

Anchors

In wooden products we use hot-dip galvanised anchors protecting wood against direct contact with the ground. They prevent rot, thus extend the lifespan of wooden products and ensure many years of use.

Chains

Certified AISI 304 and AISI 316 stainless steel chains.

Protective plugs

Rubber or polypropylene protective plugs protect the main construction profiles against weather conditions and children from injuries.

Bolts

AISI 304 and AISI 316 stainless steel or galvanised bolts are secured against external factors by durable polyamide caps. This makes our equipment resistant to wear and tear as well as to changing weather conditions.

Movable elements

Elements from the Fitness series based on two groups: the Swiss articulation system – safe, durable and long-lasting, allowing fully guided movement, resistant to overload, weather conditions and vandalism, with a mechanical stop and a durable bearing system closed in the casing, thanks to which it does not require lubrication and maintenance. These parts ensure a long service life of devices with moving parts.

Guarantee

The highest quality of our products is ensured by experienced specialists and high quality materials. That is why we can offer our customers a long-term guarantee of fault-free and fully safe use of our devices. We also provide post-warranty services. Orders for most spare parts are completed within 48 hours.

Selected warranty periods:

30 year guarantee

Structural strength of steel and stainless steel components

15 year guarantee

Structural failure of steel and stainless steel, for dynamic equipment; structural elements made of Robinia wood

10 year guarantee

Structural failure of high density polyethylene and high pressure laminate components

5 year guarantee

Corrosion of stainless steel and hot-dip galvanized and powder coated components; against bark beetles and rot in case of wooden structural elements

More information on other warranty periods for selected parameters - available on request in the Guarantee Card.

Design your playground!

Design a functional and safe playground with the 3D Planner application. Thanks to this user-friendly app you will be able to create several versions of the playground and choose the one you like the best in just 5 minutes. Upload a photo of the space you have at your disposal and fill it up with Vinci Play equipment. See what your new playground will look like in the morning, in the evening and during different seasons of the year. You will be able to export the created visualizations to .jpg/.png or .pdf files. Our 3D application will calculate the area needed for the installation of the Vinci Play equipment based on their safety zones, so that your modern playground can meet all the requirements of the EN 1176 standard.

A photograph showing a person's hands interacting with a laptop keyboard while the screen displays the 3D Planner software interface. The software shows a 3D model of a playground with various pieces of equipment like slides and climbing frames. A speech bubble in the top right corner contains the text "WATCH VIDEO!" next to a QR code. In the bottom left corner of the image area, there is a callout box with the heading "1. How to start?" and a descriptive text below it.

1. How to start?

You can easily name the project, define the size of the area and the shape and size of the playground.

2. Choosing Vinci Play products

You can search for a Vinci Play product by the age of users, product series, materials or colour versions through a quick and intuitive search engine. The application contains an up-to-date library of all devices available in the offer.

3. Adding products, plants and creating a playground of your dreams

Adding equipment or plants is child's play. As soon as you make your choice - just click on the product (or on a plant) and drag it to the selected area. When putting more products, special attention should be paid to ensure that the safety zones of individual elements do not overlap (this is very important!) - when this happens, the contact area will be highlighted in red.

4. Defining surface texture

Each playground also has a surface. Not all devices can be installed on grass or sand. You can easily sketch various shapes on the surface that can be made of flexible poured surfaces. Just choose a defined shape - circle, square or hexagon, or draw an irregular shape by hand. It is very easy! Then you can choose the colour or texture of each element of the surface.

5. Displaying a 3D view and printing

All steps so far have taken place in top view. It's cool, but the visualization of the playground is something that interests us much more. How to show a 3D view? It's also very easy. Just click one button and the playground we have created will show up in all its glory! The view can be zoomed in and out, shown from different angles, thanks to which we will feel as if we are walking on an already existing playground. We can also quickly print a specific view and leave it with the customer together with the offer.

What's new?

Over 100 brand-new and attractive playground structures await children this season. New products are distinguished by their unique design and modern functionalities. These safe, fun-inspiring tower constructions and themed products stimulate the imagination and are sure to provide both younger and older children with hours of carefree fun.

High towers

Towers reaching up to 9,5 m, connected by bridges, with a whole range of fun and activity elements, with stainless steel tube slides, enabling joyful play for children of all ages.

Robinia series

Robinia series consists of playground equipment made of natural raw material - Robinia acacia wood, the most durable wood found in Europe. Products, enriched with slides, handrails and ladders made of stainless steel, and elements made of HPL plates in subdued colours are an excellent extension of the offer enabling the design of a natural and elegant playground.

Thematic series

The new CASTILLO, JUNGLE and the SPACE series are high towers and multifunctional sets with motifs and printed polycarbonate referring to the times of chivalry, jungle and space exploration. Made of the highest quality materials, enabling children to have fun at any age.

Role playing devices

A lighthouse with a height of 7 m, station with fire engine or train station are devices that allow you to create a themed playground providing unlimited number of roles to play. Wooden structures based on systems known from the WOODEN series, enriched with durable PE tube slides.

Complementary devices

The individual Vinci Play series are characterized by separate colour, material, motif and form. We have prepared classic devices, incl. swings, carousels, spring riders and sandboxes to complement each of the series.

Inclusive devices

Carousels and swings designed for easy and safe use for people who move independently in a wheelchair and for joint integration fun for everyone, without age and fitness restrictions.

Movable equipment

Carousels, swings (including see-saws), spring riders and outdoor gym equipment based on articulated systems or closed bearings which do not require maintenance. Equipment, which allows physical activity, makes playground more attractive, allowing development of many skills while bringing a lot of joy.

Jumpoo series

Durable outdoor trampolines encouraging activity, made of the highest quality materials. Jumping on the trampolines strengthens muscles, has a positive effect on motor coordination, and at the same time enables unrestricted fun.

Fitness series

The Fitness series was created with wellness in mind, encouraging to train and lead a healthy lifestyle. The series devices are available in several colour and material options which will allow you to create a professional outdoor gym responding to various needs.

Workout series

A series designed for development, keeping fit and returning to good physical condition. Steel and wooden structures with many bars and elements for training with the weight of your own body. Modern design, durable materials and colour options, perfect for creating a contemporary sports ground.

Arena series

Multifunctional sports fields with a modular construction, based on galvanised steel profiles and panels available in several material options, consisting of goals of various sizes, basketball baskets, will encourage children of all ages to spend time outdoors and compete in sports.

Walk in the clouds!

The 9,5 m high towers, with challenging bridges, activity elements and tube slides stimulate the imagination and enable inspiring fun. Towers with a theme referring to fairy tales and stories about castles, knights, princesses and dragons. They allow for fun and role play.

Robinia, naturally!

The ROBINIA series is an inexhaustible source of inspiration for play for younger and older children. The variety of educational and sensory panels, as well as moving elements, stimulate in children great interest and joy.

The environmentally friendly, wooden devices in the ROBINIA series stimulate the comprehensive physical development of a child and allow a large group of children to play at the same time. Thanks to this, the child learns to establish relationships with peers, and cooperate in a group.

Over 150 playground-equipment, sports, and small architecture products fit perfectly into both the natural landscape and modern architecture.

Robinia wood

The acacia wood used in the production of the Robinia series contains many oils which protect the material very well against weather conditions, naturally preserving it against rotting processes and pests. By obtaining wood, we are sure that it comes from European FSC®-certified forests and other controlled sources, thanks to which we care for the future in the spirit of sustainable development.

Safety standards

In order to maintain the unique and irregular nature of the acacia wood, each product is individually prepared in accordance with the safety standards. In the Robinia series, we have developed unique technical solutions ensuring compliance with the EN 1176 safety standard. The products are certified by the international certifying institution TÜV SÜD. In addition, our production plants undergo periodic control audits by independent certification bodies.

Safe finish

Thanks to the processing of wood by sanding, we smooth its surface, erasing any rough edges or unevenness, so we make the product not only aesthetic but also safe.

Anti-slip HPL plates

Anti-slip HPL plates are a perfect supplement used in various types of steps and small platforms. Thanks to their highest quality, they are resistant to chemical and biological factors, UV rays, and changing weather conditions. The safe anti-slip structure, subdued colours, and natural look, all perfectly harmonise with the wooden style of the series.

Durable metal parts

In order to guarantee the highest quality and long-term use of the Robinia series, we have supplemented it with bars, slides, and other construction elements in stainless steel and hot-dip galvanised steel.

High-quality ropes

We use galvanised steel ropes sheathed in polypropylene braid in the production of climbing elements. The fitted aluminum rope connections, and safe, calibrated, stainless steel chains, ensure the reliability of solutions and safety of use.

Quick and easy installation

Before shipment, all products undergo preliminary assembly in our factory to prevent jams. We have developed a special connection system, consisting of appropriate undercutting, specialised fastening, and machining holes in key places. Thanks to the clear instructions and the individual marking of the components, it is possible to install quickly and easily, without specialist knowledge and tools.

Packing and transportation

All elements are manufactured in such a way, that it is possible to transport both by road (by bus, or semi-trailer), or by sea or air. The appropriate packing of the elements optimises space and transport costs, and facilitates convenient unloading without the need for cranes or specialist equipment.

Arena, let's play!

The Arena is a multifunctional playing field that can be an independent sports facility, perfectly suited for public spaces. In the Arena you can play football, basketball, handball, hockey, tennis and many more.

Thanks to the modularity of the size and functional design, as well as the possibility to choose the material and colour version, the Arena can be adapted to individual needs.

jungle

Wild adventure!

The JUNGLE series will allow you to climb to the heights and conquer the unconquered.

High, up to 9,5 meters above the ground, the greatest adventures will take place like in the crown of trees! Among green leaves, branches and colourful cheerful graphics, everyone will be able to turn into a traveler and explorer.

High tube slides are real fun - not only for small kids, and the climbing elements are a challenge and encouragement to be active.

steel+

Simple fun!

The STEEL+ series comprises modern tower structures with many features that will delight both younger and older children.

Colourful towers enriched with musical elements are just the perfect place to have some fun with fellow companions and are also a great spot for relaxation.

A vast variety of devices with educational elements facilitate the integration of children of different fitness levels.

Characteristics of the STEEL+ series:

Galvanised steel construction

Stainless steel construction or elements

HPL HEXA platforms

HDPE panels

Polycarbonate (PC) panels

UV printed PC panels

Stainless steel slides

Durable connectors

Ropes with steel core

Protective tops

PP tunnels

Colour & material options*:

Colour (panels):

- HDPE - RAL6024
- HDPE - RAL3020
- C11E HDPE - multicolour
- HDPE - RAL5015
- HDPE - RAL8024

Construction:

- Painted steel RAL 7040
- Stainless steel
- Fiberglass

Slides:

- Stainless steel
- PE

Tubes:

- Stainless steel
- Surface

Anchoring:

- Deep

topicco

Play a role!

A series of role-playing devices: a train station, a fire station, a fire truck, a lighthouse, a ship, a truck or a roller. These devices release a child's natural tendency to play happily and learn the "adult world" as well as engage in teamwork training.

The TOPICCO series offers a number of elements such as educational panels or manual elements that stimulate motor skills and positively affect the intellectual development of young children.

wooden

Equipment from painted wood

The WOODEN series is an endless source of inspiration for both younger and older children how to have fun.

Various educational and sensory panels, coupled with moving elements, will bring children lots of joy and draw a lot of interest.

The environmentally friendly wooden equipment from this series stimulates the child's comprehensive physical development and also allows a large group of kids to play together at the same time. Thanks to this, child learns how to establish relationships with their fellows and how to work as part of a team.

Characteristics of the WOODEN series:

Wood construction

Galvanised anchors

HPL HEXA platforms

HDPE panels

Polycarbonate (PC) panels

Stainless steel elements

Stainless steel slides

Durable connectors

Ropes with steel core

Protective tops

PP tunnels

PE tube slides

Colour & material options*:

Colour (panels):

● C1 HPL - RAL6000

● C2 HPL - RAL3000

● C11E HDPE - multicolour

● C3 HPL - RAL5024

● C9 HPL - wood pattern

Platforms:

- HEXA HPL

- HEXA plywood

Slides:

- Stainless steel

- Fiberglass

Anchoring:

- Surface

- Deep

*Material options apply to selected products, for more information visit: www.vinci-play.com

solo.

Fun for youngsters!

The SOLO series is a paradise for preschoolers, which is ruled by sand, water, sound and movement.

Free fun develops natural creativity of the child, encourages to do experiments and triggers the desire to cooperate with other children.

The richness of colours, manual and sound elements, along with educational panels: all these elements comprehensively stimulate the senses and the intellectual development of child.

minisweet

Colourful series for the youngest

The MINISWEET series consists of playground equipment designed for the youngest children and preschoolers.

Friendly houses, tunnels and slides are an ideal place to have fun together. This is also where the child learns the principles of functioning in a group while perfecting its language skills.

Minisweet devices encourage children to exercise and support the development of key mobility aptitudes. They allow every toddler to enjoy joyful and carefree fun.

steel

Classic tower sets

The STEEL series consists of classic structures that offer unlimited fun for older children. The sets of equipment from this series can be perfectly adapted to the needs of children and the available space.

Rows of towers connected by various attractive movable elements make for a great training ground for motor coordination. They allow a large group of children to play together at the same time, which helps to establish relationships and also teaches teamwork as well as healthy competition.

Unique houses

The CROOC series is all about beautiful, unique designs, vibrant colours and multi-tower playground sets that allow large group to have fun together.

Fairytale houses encourage children to engage in role-playing activities with their fellows. Element merging platforms, ladders, climbing walls and slides of different difficulty levels comprehensively stimulate the proper motor development of each child.

This series guarantees that the child's energy is channeled effectively.

climbo^o

Climb, crawl and pull-up

The CLIMBOO series comprises equipment that develops the fitness and coordination of older children, increasing their faith in their own abilities.

Various climbing ladders and walls with a varying level of difficulty strengthen the muscles and teach the child to concentrate and maintain balance.

This series is the perfect place to organise competitive games where exciting physical challenges are coupled with maximum safety.

nettix[®]

Ropes, ladders and spinners

The NETTIX series comprises modern equipment in the form of ladders and rope crossings, which constitute a combination of carefree fun and effective fitness training.

Rope climbing stimulates the sense of balance, strengthens the muscles and improves the child's dexterity. It also encourages children to compete with each other.

This series is a creative adventure among ropes, where the boundaries are set only by the children's imagination.

a spring

Rocking and swaying

The SPRING series equals pure energy on springs. It satisfies the child's natural need for unrestrained and carefree swinging.

Colourful vehicles and happy animals encourage kids to jump energetically and sway in the rhythm of body movements.

The spring riders, which are so beloved by children, allow for joyful fun which also carries great benefits for kids' development.

swing

Swinging in full swing!

The SWING series includes classic equipment beloved by younger and older children.

Colourful single swings, see-saw swings, multi-swings with bird's nest seats and weight-balanced multi-swings offer a pleasant thrill for children and encourage them to play with their friends.

Rhythmic swing movement is an effective body balancing exercise that has a positive effect on the development of the muscular and nervous system.

hoop

Spin, spin!

The HOOP series consists of roundabouts and spinners which drive the world of laughing children.

Spinning is an important activity for the child's development as it promotes the maturation of the nervous system, stimulates the sense of balance, strengthens the muscles and the skeletal system. At the same time it is a source of exciting sensations. For an older child, it is often a favourite place of crazy fun with friends.

Colourful carousels encourage both younger and older children to have fun together.

Robinia

New
series!

Destination: nature!

The ROBINIA series consists of playground equipment made of natural raw material - Robinia acacia wood, the most durable wood found in Europe. The wood is characterized by natural, bright colours, has high weather resistance, does not require impregnation and can be anchored directly in the ground.

The unique Robinia series has been designed in a comprehensive way to enable creating an offer containing all types of playground equipment: from tower sets with many climbing elements, through spring riders, carousels and swings, to small architecture.

Characteristics of the ROBINIA series:

Robinia wood construction

Ropes with steel core

Stainless steel elements

HPL panels

Stainless steel slides

New
series!

Products available
in the first quarter of 2022

Anyone can be an athlete

The steel parts of the goals and baskets, fencing, guards and gates are hot-dip galvanised or made of durable composite and wooden elements, fully resistant to weather conditions or mechanical damages. The highest quality construction and materials are resistant to the loads associated with the use of the field. Thanks to the modularity of the size and functional design, as well as the possibility to choose the material and colour version, the Arena can be adapted to individual needs.

sport

Want to play?

The SPORT series comprises football and hockey goals, basketball hoops and trampolines which all encourage children to take on sport challenges among their fellows. Jumping on a trampoline brings a lot of joy for every child, but it is also an effective exercise of balance, endurance and movement coordination. The equipment from this series integrates kids while releasing the spirit of sport competition.

Characteristics of the SPORT series:

Galvanised steel construction or elements

Reinforced belt fabric

Surface: coloured rubber

jumboo

Jump to the sky!

Jumping on the trampolines is a great fun, but also a great training! It allows you to strengthen your muscles, improve fitness and coordination, and at the same time reduce stress and tension, allowing you to relax.

Our trampolines are available in various colours and thanks to the special structure of the elements, any combination of shapes.

Characteristics of the FITNESS series:

Galvanised steel construction

Stainless steel construction or elements

Robinia wood construction

HPL HEXA platforms

HPL panels

Polycarbonate (PC) panels

Durable connectors

Protective tops

Movable elements

Colour & material options*:

Colour (construction in steel):

● C8 - NCS-S 1060-G 60Y

● C16 - RAL6013

● C18 - NCS-S 2040-B 10G

● C12 - RAL7040

● C17 - RAL4008

● Ci - stainless steel

Construction:

● Painted steel

● Robinia wood

Anchoring:

“park”

Small park architecture

The PARK series is a necessary complement to a kid-friendly playground.

Comfortable benches and tables, colourful litter bins, information boards and fences – all these elements ensure comfortable relaxation for children, their parents and caregivers.

The modern and aesthetically pleasing design of street furniture harmoniously blends in with the playground equipment.

LEGEND

	Colour variants		Rubber / PP protective tops
	Facilitated access for children with disabilities		HDPE - high density polyethylene panels
	Spinning elements		Stainless steel or PE tube slides
	Reinforced belt fabric		Climbing stones
	Carousel platforms made of HPL		Attested stainless steel chains
	Polycarbonate (PC) panels		UV printed PC panels
	Steel construction and/or elements made of hot-dip galvanised and powder coated steel		Construction made of impregnated laminated wood, post dimensions: 90 x 90 mm
	HPL - the highest quality, water and UV resistant high pressure laminated panels		Steel spring 20 mm, sand-blasted, iron phosphated and double powder coated
	Connectors, screws, washers and nuts made of stainless steel and/or galvanised steel protected with plastic caps		Stainless steel or fiberglass slides with side panels made of HDPE or HPL
	Polypropylene (PP) or Nylon combination ropes with steel core		Tunnels made of durable, vandal-proof, double-layered material
	Stainless steel (AISI 304 or 316) - stainless steel structure - stainless handrails and rods		Certified swing seats: - Flat seats of rubber compound with aluminium insert - Toddler seats for small children with soft gripping
	Anchoring options: - deep to the ground – 55 cm - to concrete with plates – 5 cm - to concrete with plates – 55 cm		Platforms and climbing walls made from anti-slip and waterproof plywood or HPL HEXA panels – effective protection against environmental factors and wear-resistant
